Professional Summary

B.Tech Computer Science graduate with hands-on LLM post-training and evaluation experience, including prompt testing, response evaluation, and human-in-the-loop workflows. Skilled in Python, prompt engineering, and building AI-powered applications using the OpenAI, Anthropic, and Gemini APIs, with additional experience in computer vision (OpenCV, MediaPipe) and AI workflow automation (n8n, Make). Working knowledge of machine learning and NLP concepts, including RAG fundamentals.

Technical Skills

AI & Machine Learning: Python, Machine Learning, Generative AI, NLP
LLM & GenAI: Prompt Engineering, LLM Evaluation, Human-in-the-Loop Evaluation, Response Evaluation, Prompt Testing, RAG Fundamentals
Computer Vision: OpenCV, MediaPipe
AI Application Development: OpenAI API, Anthropic API, Gemini API, FastAPI
AI Workflow Automation: n8n, Make (Fundamentals)

Experience

LLM Post-Training Intern Mar 2026 – May 2026
Ethara AI

- Supported LLM post-training workflows through structured data preparation, response evaluation, and quality assurance for large language model outputs.
- Reviewed and rated AI-generated responses for accuracy, relevance, coherence, and overall quality, performing comparative evaluation across multiple model outputs.
- Designed and tested prompts across diverse scenarios to analyze model behavior, consistency, and edge cases.
- Annotated and labeled AI outputs to support LLM training and validation workflows.
- Identified and documented recurring model-response issues and failure patterns using human-in-the-loop evaluation methods.
- Collaborated with cross-functional teams via Slack and tracked evaluation tasks using MultiMango.

Projects

Hire Vision — AI-Powered Interview Analysis Platform

- Built real-time computer-vision pipelines using OpenCV and MediaPipe to analyze eye contact, posture, and facial expressions during interviews.
- Designed confidence and performance-assessment logic based on extracted visual signals from live video streams.
- Developed recruiter and candidate dashboards to surface assessment results and scheduling.
- **Technologies:** Python, Flask, MongoDB, OpenCV, MediaPipe.

AI Summarizer — Generative AI Text Summarization App

- Integrated an LLM through the OpenAI API to generate summaries from user-provided text.
- Designed and tuned prompts to control summary length, tone, and output behavior.
- Built the application layer, including authentication and summary history, around the model using React, TypeScript, and Supabase Edge Functions.
- **Technologies:** OpenAI API, Prompt Engineering, React.js, TypeScript, Vite, Supabase.

Gmail AI Agent — AI-Powered Email Automation

- Built an AI-powered Gmail automation workflow using n8n to process and analyze incoming emails.
- Integrated an LLM through the n8n workflow to interpret email content and generate context-aware outputs.
- Applied AI-based email classification and workflow logic to identify email type and importance, then automated downstream Gmail actions based on the AI-generated output.
- Designed an event-driven workflow connecting Gmail, the LLM service, and n8n automation nodes to reduce repetitive email-processing tasks.
- **Technologies:** n8n, Gmail, LLM API, Generative AI, Workflow Automation.

Education

Kamala Institute Of Technology and Science 2022 – 2026
B.Tech in Computer Science and Engineering CGPA: 7.8/10

Certifications

- HTML5 Course Completion Infosys Apr 2024
- Cyber Security IBM x Microsoft Aug 2024
- AI with Cloud Computing Brain O Vision Apr 2025
